ORACLE®

Transformation

ORACLE®

A photograph of a modern office building at night, with many windows illuminated from within, creating a grid of light and dark squares. A large, solid red diagonal shape cuts across the right side of the image, starting from the top right and extending towards the bottom left. The text '6%' is written in white on the red background.

ORACLE®

ORACLE®

What We Built

A **complete, open, and secure** platform that spans **all layers** of the cloud, and provides **choice and access** to innovation for all

A Cloud Without Compromise

Enabling the Journey

- **From any starting point**
- New cloud, private cloud and hybrid
- All workloads, developers and data
- Connect all apps, business practices
- Go beyond just migrate

Connecting
businesses
and people to
information

Oracle Cloud

An integrated platform
that provides
unprecedented ability to
take **meaningful steps**
toward genuine business
transformation

Oracle SaaS

Engagement

Experience

Efficiency

Empowerment

Unlock business value
and performance by
enabling businesses and
people to be more
informed, connected,
productive, and engaged

Oracle SaaS

Supply Chain

ERP/EPM

Modern HR

Marketing

Sales

Service

- Best-in-class modern cloud apps for modern business demands
- Complete suite spanning every business category
- Integrated business processes, connected people across the enterprise

Oracle SaaS

- Shift engagement models: systems to people
- Increase performance through informed and engaged employees
- Build preference, interaction, empowerment
- Deliver personalized experiences across channels
- Improve operation efficiency; insights into action

Transform by unifying, enriching, and extending these tools

Oracle PaaS

Integrate & Extend

Develop & Deploy

Connect & Share

Discover & Visualize

Manage & Secure

Innovate, integrate,
connect, secure, and
discover with an
integrated underlying
platform for change

Big Data

Management

- Broadest offering across all major categories
- Same capabilities in cloud as on premises
- Automation through cloud tooling; focus on outcomes vs. administration

Oracle PaaS

- Broadest offering across all major categories; same capabilities in cloud as on premises
- Innovate, integrate, secure, and discover
- Automation through cloud tooling; focus on outcomes vs. administration
- Extend, develop, and drive insights across all apps and data: Oracle, third-party, or custom

Seamlessly integrate with IaaS to scale and migrate workloads

Oracle IaaS

Seamless Migration

Predictable Performance

Scalable & Dedicated Resources

Accelerated Deployments

Secure Connections

Scale business and
accelerate cloud
transformation,
combining IaaS with
PaaS and SaaS

Oracle IaaS

Networking

Compute

Storage

- Best-in-class storage, networking, and elastic compute services
- Broad range of Compute offerings to handle diverse use-cases
- Secure, reliable, with industry-leading scale

Oracle IaaS

- Simplified and faster migration of all workloads
- Shift virtualized workloads without change
- Deployment choice and portability
- Predictable, consistent performance, isolation
- Business and data preservation, retention
- Enterprise grade—workloads, visibility, support

Based on our portfolio of converged infrastructure systems

Solutions for Every Category

Service

ORACLE®

Complete

Open

Secure

Choice

ORACLE®

Complete

- Spanning all layers of the cloud: IaaS, PaaS, SaaS
- Every layer...integrated
- Based on our foundational infrastructure platforms
- Reduces complexity
- Every category and stakeholder
- Consumption models for all

Open

- An open, standards-based platform
- Supports all workloads, applications, languages, open source, OS platforms, data types
- For everyone to build on, customers and partners
- Integrated with Oracle apps and the application ecosystem

A hand is holding a tablet. The screen shows a data table with columns for ID, Name, and other details. Below the table is a pie chart with several segments. The background is a blurred office setting.

Secure

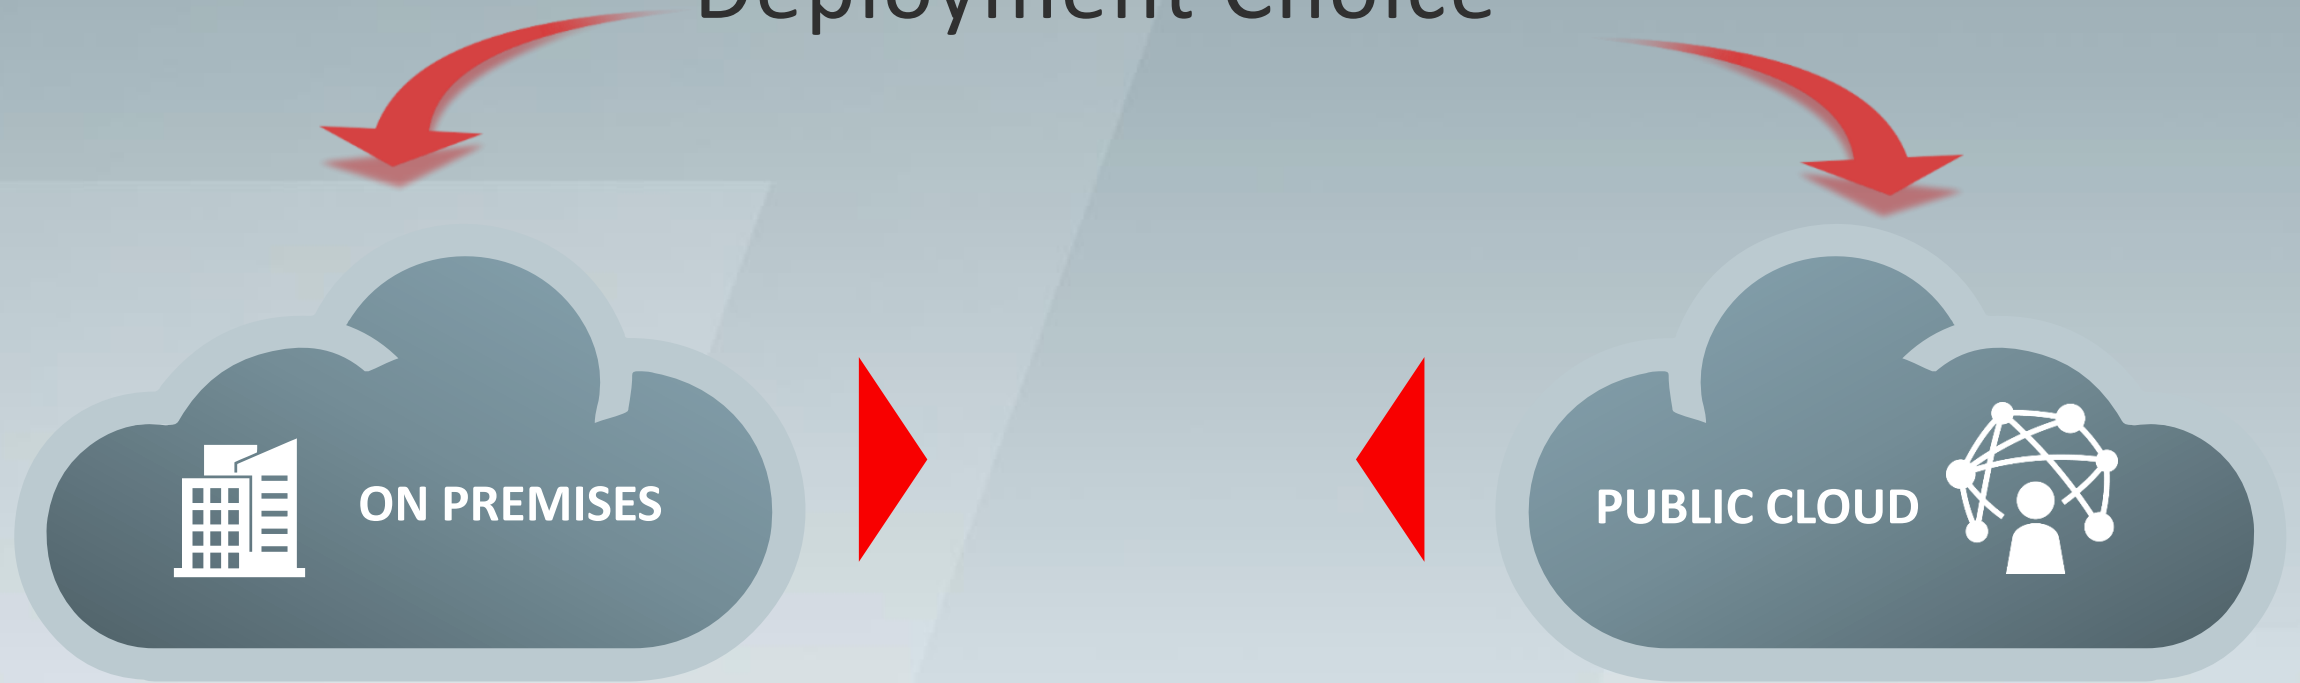

- Offers protection for every layer
- Physical data center access
- Encryption of data at rest, in motion
- App access; privileged users controls
- Masking, redacting sensitive data
- Identity access management

Choice

- Deployment: private, public, Cloud at Customer, hybrid
- Same environments preserve existing IT investments, skills
- Migration and adoption paths—infrastructure, apps, extensions, integrations, dev, production

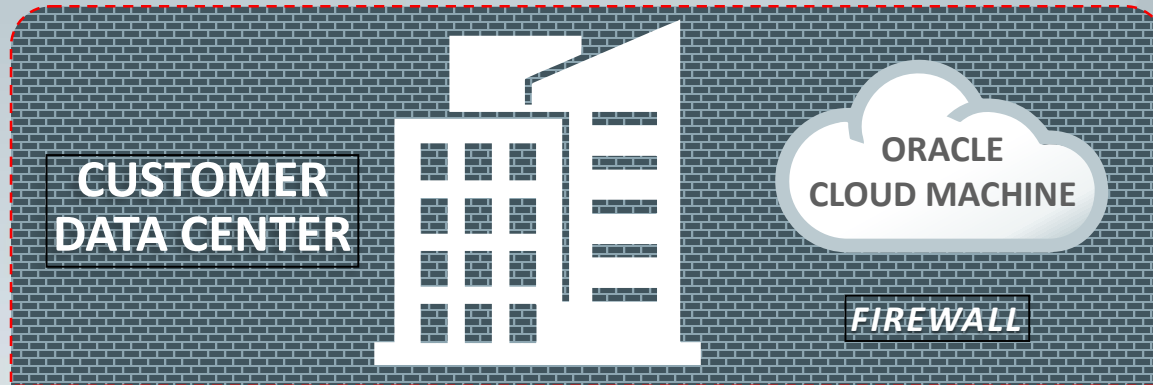

Complete Deployment Choice

Move Workloads Between On Premises and Public Cloud

Oracle Cloud at Customer

Complete Deployment Choice

PUBLIC CLOUD

Exact Same Oracle Public Cloud Services
Deployed on Customer's Premises
